

VISAS

A US passport proves who you are and that you are a US citizen. It does not give you permission to enter another country. That permission comes from the country you are visiting, and many countries grant it through a visa.

Each country sets its own entry rules. A visa lets the host country screen visitors before they arrive, confirm the purpose and length of the stay, and apply the same requirements to US travelers that the United States applies to its citizens.

01 APPLICATION AND COST

- The Short-Term Logistics Team will provide the Country Visa Application form and requirements on the Opportunity Page in ServiceReef.
